## News Release

**Contact: Sue Zillman**

**847-391-2682 sezillma@uop.com**

**June 25, 2002**

**For Immediate Release**

### **UOP and Ortloff Sign Cooperative Marketing Agreement**

Des Plaines, IL USA – UOP LLC is now offering Ortloff’s ethane recovery, propane recovery, and sulfur recovery technologies for license through a worldwide marketing alliance with Elcor Corporation, owner of Ortloff Engineers, Ltd. Ortloff’s proprietary know-how, design packages, and consulting and engineering expertise in the cryogenic gas liquids recovery and sulfur recovery plant markets complement UOP’s natural gas processes, products and technical support.

This relationship enables UOP to provide a complete, optimized, and integrated technology solution for a natural gas plant project. Project definition, process selection, optimization, basic engineering and technical support can be carried out by the UOP-Ortloff team. Choosing a single technology supplier allows the end user to shorten the project schedule, reduce capital investment, and gain the operational benefits of an optimized overall plant design.

Ortloff Engineers, Ltd., headquartered in Midland, Texas, USA, is a leading supplier of cryogenic gas liquids recovery processes and sulfur recovery plant design know-how to these same industries. Elcor Corporation, Ortloff’s parent company, is headquartered in Dallas, Texas, USA. Its common stock is listed on the New York Stock Exchange (ticker symbol:ELK).

UOP LLC, headquartered in Des Plaines, Illinois, USA, is a leading international supplier and licensor of process technology, catalysts, adsorbents, process plants, and technical services to the gas processing, petroleum refining, and petrochemical industries.
